STEP 1

Your supplied graphic.

STEP 2

Firstly clean the surface then, find the centre of the area in which you wish to apply the graphic, Vertically and Horizontally

STEP 3

Use either a removable marker or masking tape to mark the final position of the graphic. These are the marks in which the crosses of the graphic will line up with.

STEP 4

Using the applicator, smooth over the rear of the graphic therefore ensuring the application film is firmly stuck to the face of the graphic.

STEP 5

Slowly and carefully peel back the wax paper to reveal the sticky side of the graphic.

STEP 6

(Wet option available - 6A)

Use the applicator to smooth over the graphic from one end to the other. Ensure the crosses on the graphic line up with your corresponding marks.

STEP 6A (Wet option)

For wet application, use a spray bottle full of water with 2-3 drops of washing up liquid per half litre. Completely soak the sticky side of the graphic. This allows for some adjustment.

STEP 7

Slowly and carefully peel back the clear application film revealing your graphic. Remove the alignment crosses and your marks.

STEP 8

Turn the paper wax side down and smooth over the graphic to ensure it's fully applied. If applying wet smooth excess water from graphic.

STEP 9

You should be left with a perfect graphic.
